USE WHAT YOU'VE GOT

Keep users from doing dangerous things

- Group Policy
- Firewall settings
- Local User settings
- Education

USE WHAT YOU'VE GOT

Group Policy

- Prevent users from logging into some computers
- Prevent users from installing software
- Prevent applications from being run
- Prevent settings from being changed

USE WHAT YOU'VE GOT

Firewall settings

- Block categories of websites
- Prevent download of files
- Block malicious traffic

USE WHAT YOU'VE GOT

Local User settings: You can still these manually if you don't have a way to push them out

- Only allow use by users with the correct passwords
- Prevent users from installing software
- Prevent applications from being run
- Prevent settings from being changed

USE WHAT YOU'VE GOT

Education

- Recognizing malicious email messages
- Avoiding installing new software and apps
- Unique and strong passwords (no Post-its!)
- Keep data that should be private off of personal devices or mobile devices
